Xilinx Announces First Quarter 2017 Results; Advanced Products Grow 60% Y-T-Y, Strong Profitability

SAN JOSE, Calif., July 27, 2016 /PRNewswire/ -- Xilinx, Inc. (Nasdaq: XLNX) today announced first quarter fiscal 2017 sales of $575 million, up 1% sequentially, and up 5% from the first quarter of the prior fiscal year. First quarter net income was $163 million, or $0.61 per diluted share.

The Xilinx Board of Directors declared a quarterly cash dividend of $0.33 per outstanding share of common stock payable on August 24, 2016 to all stockholders of record at the close of business on August 11, 2016.

Additional first quarter comparisons are represented in the charts below:

"Xilinx continues to deliver on technology leadership and execution. Sales from our 28nm product family achieved a new record during the quarter. Momentum from our 20nm products continued to be strong, with sales easily surpassing our $30 million target. In addition, 16nm products continued to gain exceptional customer adoption with all three Ultrascale+ product families shipping to over 100 customers in a broad base of end markets," said Moshe Gavrielov, Xilinx President and Chief Executive Officer. "Profitability was stronger than expected during the quarter. Gross margin of 70.7% was up from 69.2% in the prior quarter, primarily as a result of operational efficiencies and mix. Operating margin was 32.4%, driven by better gross margin and controlled operating expenses."

*Return on equity calculation: Annualized net income/average stockholders' equity

**Products and Financial Highlights - June Quarter**

- The Advanced Products category grew to a record sales level, increasing 60% year over year. Xilinx continues to deliver on technology leadership and world-class execution.
- Xilinx generated a record $339 million in operating cash flow during the quarter driven by improved profitability as well as lower working capital requirements. Xilinx remains committed to a healthy return of cash to stockholders in the form of dividend and share repurchase.
- Advanced Micro Devices, ARM, Huawei, IBM, Mellanox, Qualcomm Technologies Inc., a subsidiary of Qualcomm Incorporated, and Xilinx, Inc. joined forces to bring a high-performance open acceleration framework to data centers. The companies are collaborating on the specification for the new Cache Coherent Interconnect for Accelerators (CCIX). For the first time in the industry, a single interconnect technology specification will ensure that processors using different instruction set architectures (ISA) can coherently share data with accelerators and enable efficient heterogeneous computing - significantly improving compute efficiency for servers running data center workloads.
- Xilinx announced the expansion of its 16nm UltraScale+ product roadmap with new acceleration enhanced technologies for the Data Center. The resulting products will deliver the powerful combination of Xilinx's industry-leading 16nm FinFET+ FPGAs with integrated High-Bandwidth Memory (HBM), and support for the recently announced CCIX.

**Business Outlook - September Quarter Fiscal 2017**

- Sales are expected to be approximately flat sequentially.
- Gross margin is expected to be approximately 70%.
- Operating expenses are expected to be approximately $230 million including $1 million of amortization of acquisition-related intangibles.
- Other income and expenses are expected to be a net expense of approximately $4 million.
- Fully diluted share count is expected to be approximately 266 million.
- September quarter tax rate is expected to be approximately 14%.
Conference Call

A conference call will be held today at 2:00 p.m. Pacific Time to discuss the June quarter financial results and management's outlook for the September quarter. The webcast and subsequent replay will be available in the investor relations section of the Company's web site at www.investor.xilinx.com. A telephonic replay of the call may be accessed later in the day by calling (855) 859-2056 and referencing confirmation code 32174654. The telephonic replay will be available for two weeks following the live call.

This release contains forward-looking statements and projections. Forward-looking statements and projections can often be identified by the use of forward-looking words such as "expect," "believe," "may," "will," "could," "anticipate," "estimate," "continue," "plan," "intend," "project" or other similar expressions. Statements that refer to or are based on projections, uncertain events or assumptions also identify forward-looking statements. Such forward looking statements include, but are not limited to, statements related to the semiconductor market, the growth and acceptance of our products, expected revenue growth, the demand and growth in the markets we serve, opportunity for expansion into new markets, and our expectations regarding our business outlook for the September quarter of fiscal 2017. Undue reliance should not be placed on such forward-looking statements and projections, which speak only as of the date they are made. We undertake no obligation to update such forward-looking statements. Actual events and results may differ materially from those in the forward-looking statements and are subject to risks and uncertainties including customer acceptance of our new products, current global economic conditions, the health of our customers and the end markets in which they participate, our ability to forecast end customer demand, a high dependence on turns business, more customer volume discounts than expected, greater product mix changes than anticipated, fluctuations in manufacturing yields, changing competitive dynamics due to industry consolidation, our ability to deliver product in a timely manner, our ability to successfully manage production at multiple foundries, variability in wafer pricing, costs and liabilities associated with current and future litigation, and other risk factors listed in our most recent Forms 10-Q and 10-K.

About Xilinx

Xilinx is the leading provider of All Programmable FPGAs, SoCs, MPSoCs, and 3D ICs. Xilinx uniquely enables applications that are both software defined and hardware optimized - powering industry advancements in Cloud Computing, Embedded Vision, Industrial IoT, and 5G Wireless. For more information, visit www.xilinx.com.
